Note: The printer driver needs to be installed before the "Print" button will be displayed.

MAXHUB

E-mail:

Click the "File" button in the lower left toolbar, and you can see the "Mail" button in the pop-up window.

MAXHUB

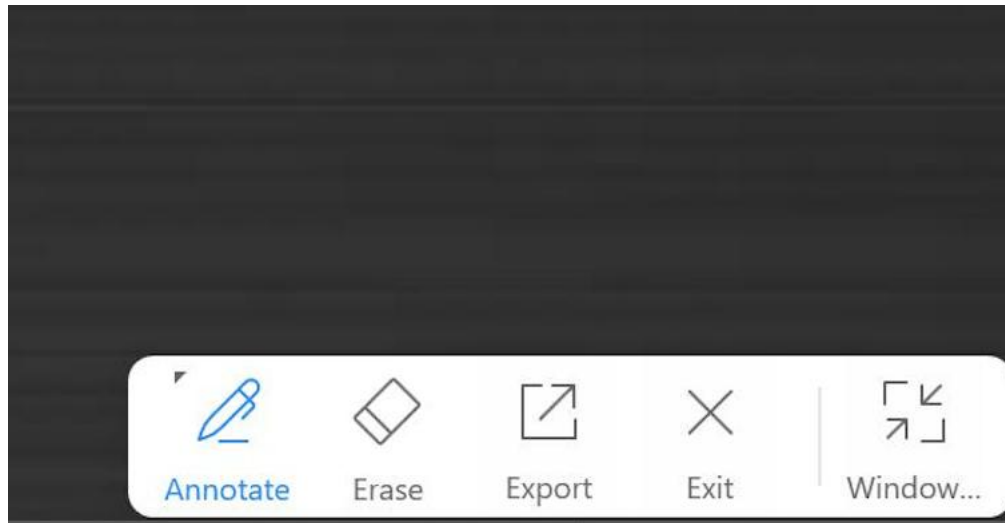

Chapter Two. Annotations

MAXHUB

What is annotation?

The annotation function allows users to write content in the current screen and make information annotations

How to start annotating?

1. Function entry:

There are three scenes to enter comments

Scene one:

When the PPT is played locally or through the screen, the comment toolbar will appear. At this time, click the comment button to enter the comment.

Note: If some versions of PPT still have a page-turning button after entering the comment, the page-side comment can be realized at this time, that is, there is no need to switch comments repeatedly, and the page can be turned directly while writing.

Scene two:

When inserting a document or video into the whiteboard, the annotation toolbar will appear in full-screen playback. At this time, click the annotation button to enter the annotation (see the operating instructions in the whiteboard for details, similar to the other two)

MAXHUB

Scene three:

In other cases, there is a comment button in the sidebar, click to enter the frozen screen comment.

PPT multi-page annotations (three-level directory)

Menu: There are multiple function operations in the menu.

End the show: when the PPT is playing, there is an end show button in the PPT annotation toolbar, click to end the show

MAXHUB

Chapter Three. Small Blackboard

MAXHUB

What is a small blackboard?

The small blackboard is a floating writing board that can be called up in any interface for temporary writing.

How to use the small blackboard?

1. Open the small blackboard:

Pull from the bottom of the conference tablet to evoke the small blackboard

Note: Can not be evoked in the case of frozen screen annotation and whiteboard full screen

2. Collapse the small blackboard:

There are two ways to put away the small blackboard.

Method one: Click the "Collapse" button on the bottom toolbar to hide

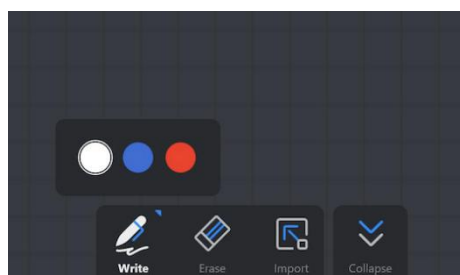

Method Two: Multi-finger hold down and flick down quickly

3. Move blackboard:

Multi-finger press and slide the writing pad to move the writing pad. (Multi-finger means two fingers and more than two fingers)

4. Insert into whiteboard:

Click the "Import" button on the bottom toolbar to import the content into the whiteboard

MAXHUB

Chapter Four.
Wireless Screen-sharing

MAXHUB

What is wireless screen sharing?

wireless screen-sharing can project the screens of laptops, mobile phones and other devices to the conference board and show it to the audience, without the need to use wires to connect to the conference board.

How to use the wireless screen-sharing device to transfer the screen?

1. wireless screen-sharing dongle pairing:

Insert the wireless screen-sharing into the USB interface of the MAXHUB smart conference tablet for pairing.

2. Start the wireless screen-sharing dongle:

3. Wait for the wireless screen-sharing to upgrade

4. Wait for the wireless screen-sharing to pair

5. The wireless screen-sharing dongle is successfully paired with the conference board

MAXHUB

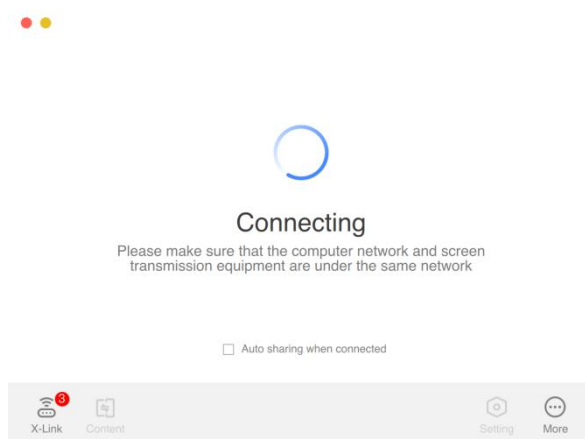

Note: The wireless screen-sharing dongle that has been successfully paired does not need to be paired again, please skip this step.

6. Connect the wireless screen-sharing dongle to the laptop.

7. When using for the first time, Apple computer users should find the application icon in the figure below on the desktop, click to open, and use the program

8. When the program is started, the computer will automatically connect to the paired MAXHUB smart conference tablet. The wireless screen-sharing dongle light flashes to indicate that it is connecting, and the screen transmitter light is always on, indicating that the connection is successful and it is in a shareable state.

MAXHUB

9. When the light of the dongle is always on, press the screen button to share the screen

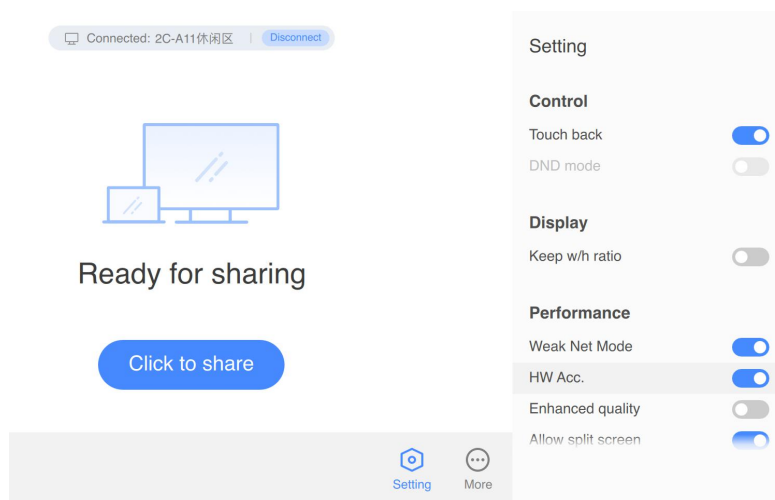

10. Press the wireless screen-sharing dongle button again to disconnect the screen and be in a ready state for sharing

11. Extended screen projection

Open the wireless screen-sharing application on the computer side (same step 7), you can choose to turn on the extended screen in the options to transfer the screen, so that the MAXHUB conference tablet can be used as an extended screen for the computer

12. Turn on the touch screen

You can choose to turn on the touch screen in the options, and then you can realize the function of controlling the computer screen on the MAXHUB smart conference tablet

How to use wireless screen-sharing dongle assistant software to transfer screen

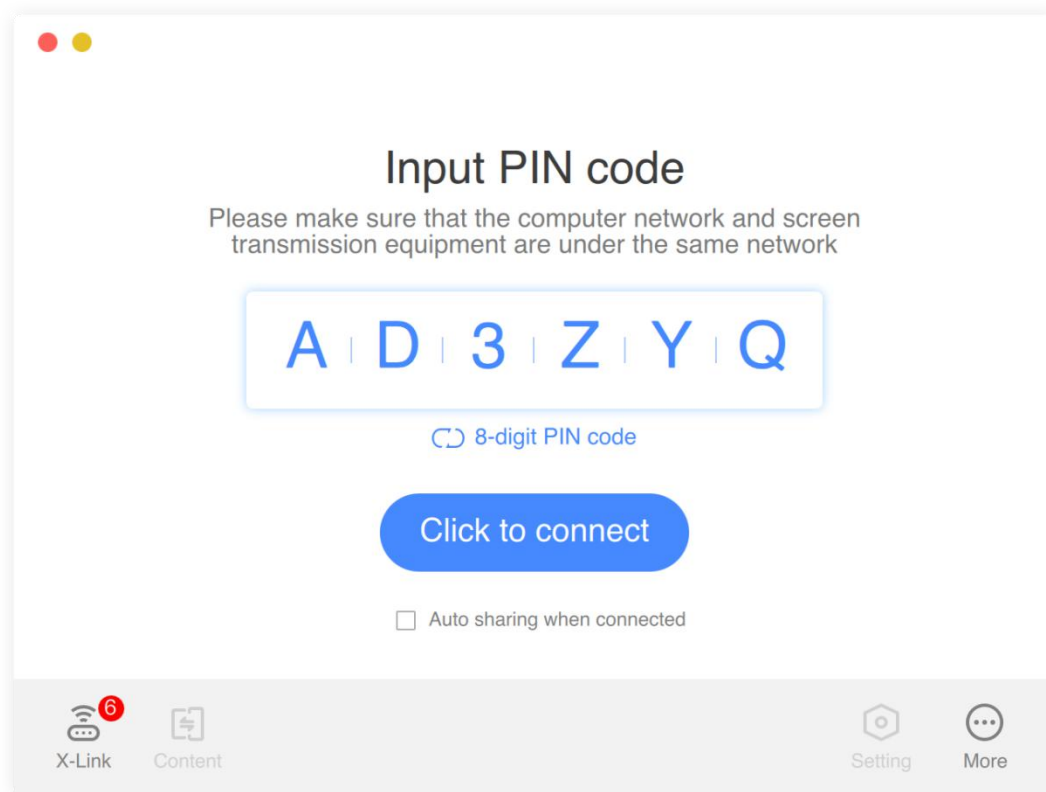

1. Please download the MAXHUB screen share in (<https://www.MAXHUB.com/en/>)

2. After download, open the app MAXHUB Share.

MAXHUB

3. Open the MAXHUB Share on interactive flat panel and check the user guide.
4. Open MAXHUB Share on PC, and then select single-screen mirroring, and when the other party is transferring the screen, the MAXHUB screen will be preempted to transfer the screen; if you choose to join the mirroring, the split-screen display will be performed when the other people is sharing the screen.

How to mirror screen from mobile phone?

1. Please download the MAXHUB share from app store.

MAXHUB

Enter the screen code on the MAXHUB screen application

[Switch to 8 bit screen code](#)

CONNECTING

Tip: Connect your phone to the same network as the MAXHUB conference tablet

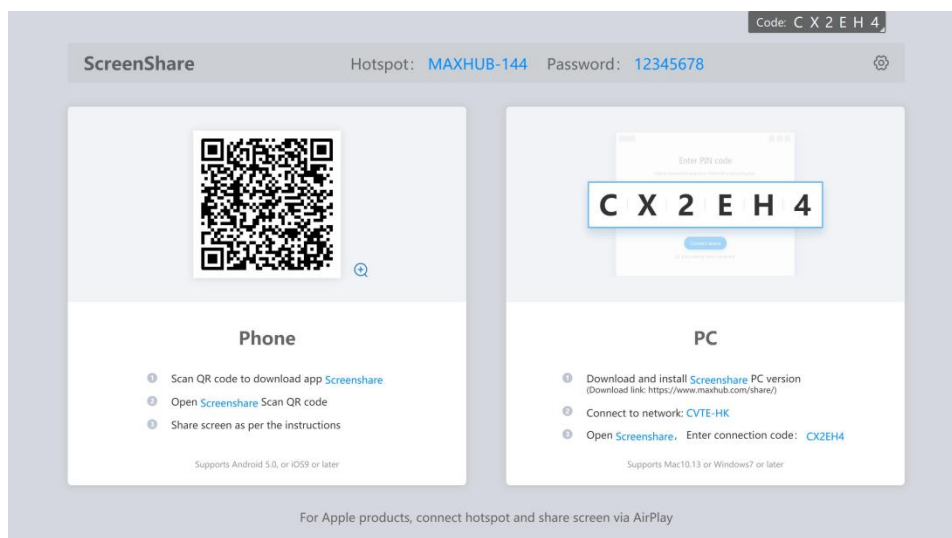

Scan the QR code on the MAXHUB screen application

Hotspot priority connection

你已经是最新版了

Nearby 2 connected devices

2. After the download is complete, open the MAXHUB share to scan the QR code or input the PIN code on the screen.

MAXHUB

3. Wait for the connection to succeed

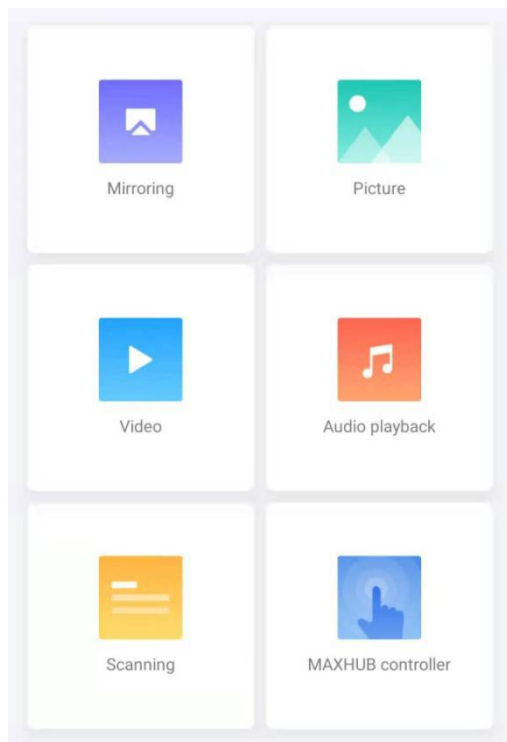

Connected: 2C-A11休闲区 | Disconnect

Ready for sharing

Click to share

4. If the connection is successful, you can select the following functions to transfer the screen.

(1) Screen sharing: You can share the screen of your mobile phone to the MAXHUB conference tablet for display;

(2) Picture display: The pictures on the mobile phone can be shared to the MAXHUB for display;

(3) Video sharing: the video on the mobile phone can be shared to the MAXHUB conference

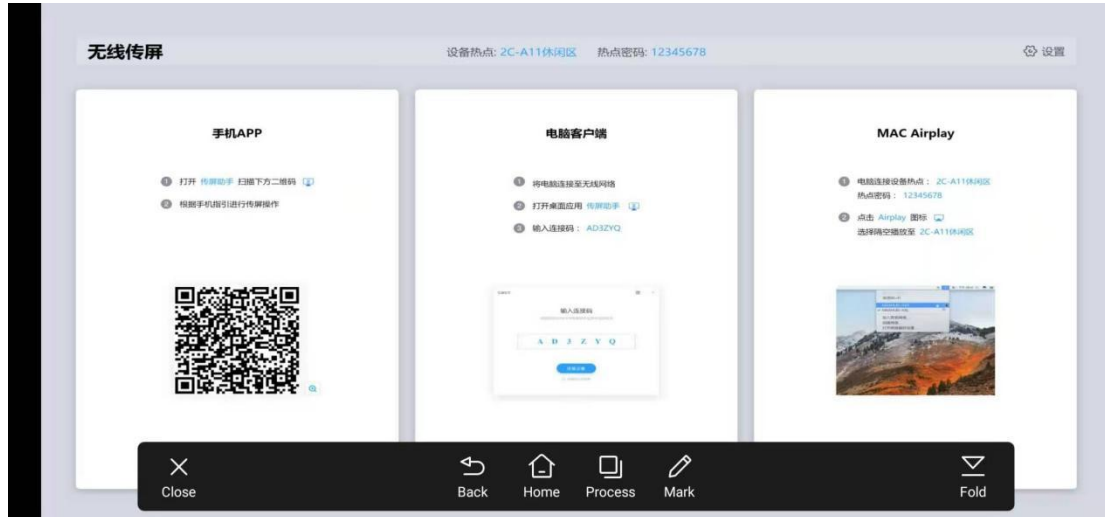

MAXHUB

tablet for playback;

(4) Audio sharing: The audio on the mobile phone can be shared to the MAXHUB conference tablet for playback;

(5) Document scanning: You can use the mobile phone camera to scan documents and share them to the MAXHUB conference tablet for display;

(6) Controller: You can use your mobile phone to control the MAXHUB conference tablet in real time.

Chapter Five. Presentation

MAXHUB

What is presentation?

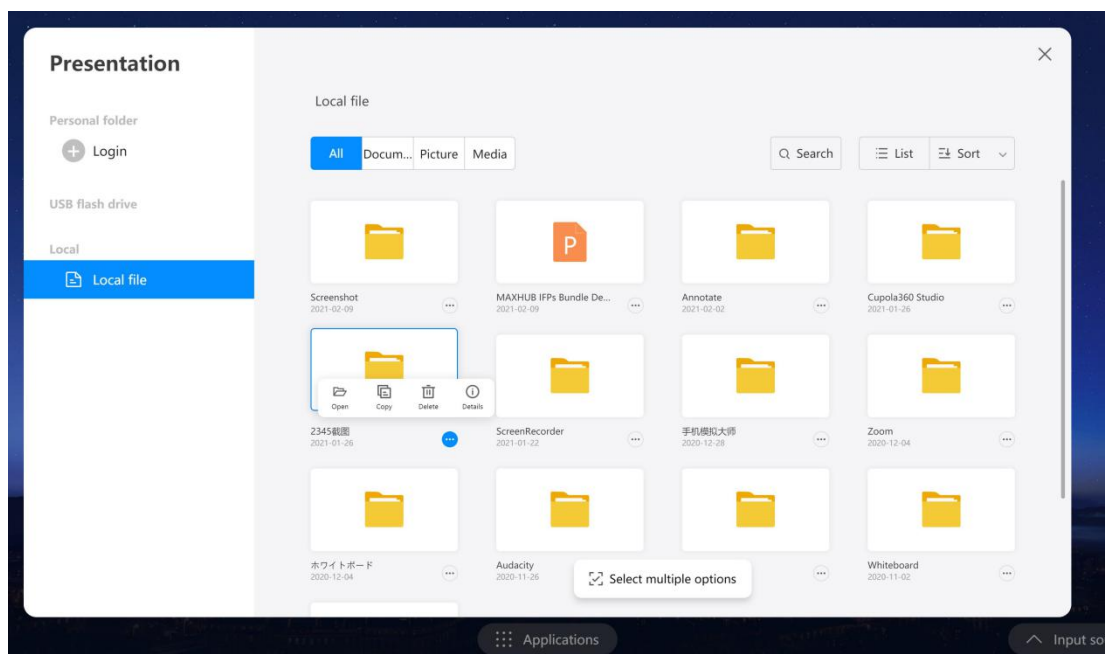

This App includes functions such as local file management, personal folder (third-party cloud disk) account login, personal folder file management, etc. Various files can be opened through the App for content display (the conference machine needs to be pre-installed with software that can open the corresponding file type Client)

How to use presentation?

1. Click the "Presentation" icon on the homepage to start the presentation App

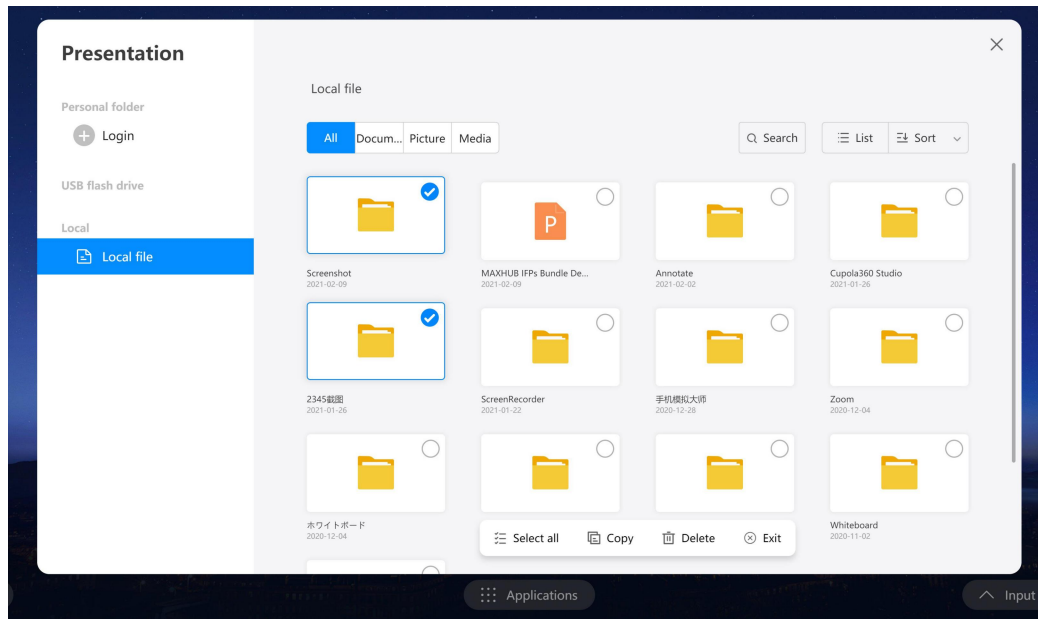

2. Click the "Login" button to complete the account login, and the presentation will load the file in the cloud of the account.

3. When the IFP is plugged into a USB disk, the presentation interface will display the drive letter of the USB storage device. Click the corresponding drive letter to load the file in the corresponding storage.

MAXHUB

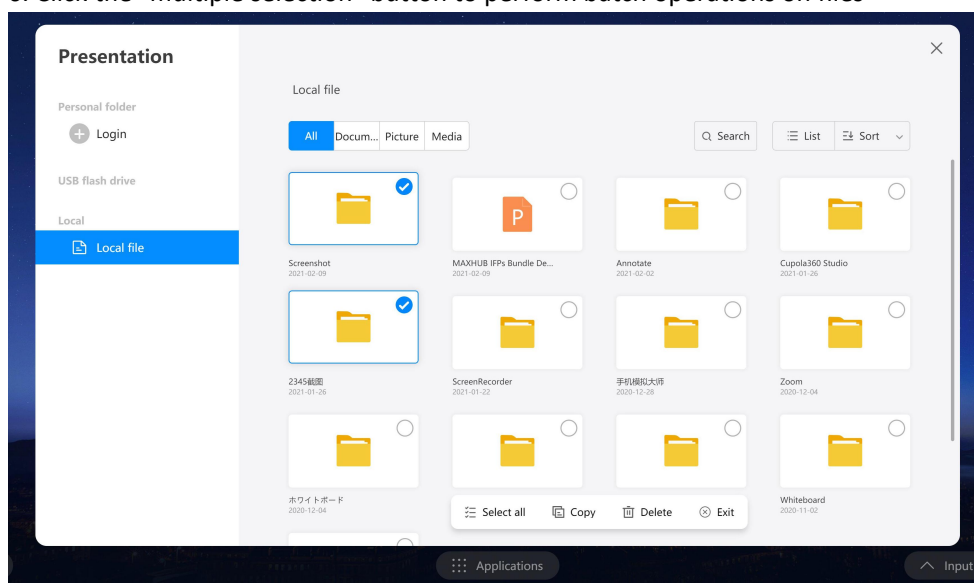

4. For files in the IFP's local, USB storage devices, and personal folders, you can filter and display the files of the corresponding type by clicking the file type filter button on the interface

5. Click the menu button on the file list interface to display the floating toolbar, open, share, copy, delete and other operations on the file.

6. Click the "multiple selection" button to perform batch operations on files

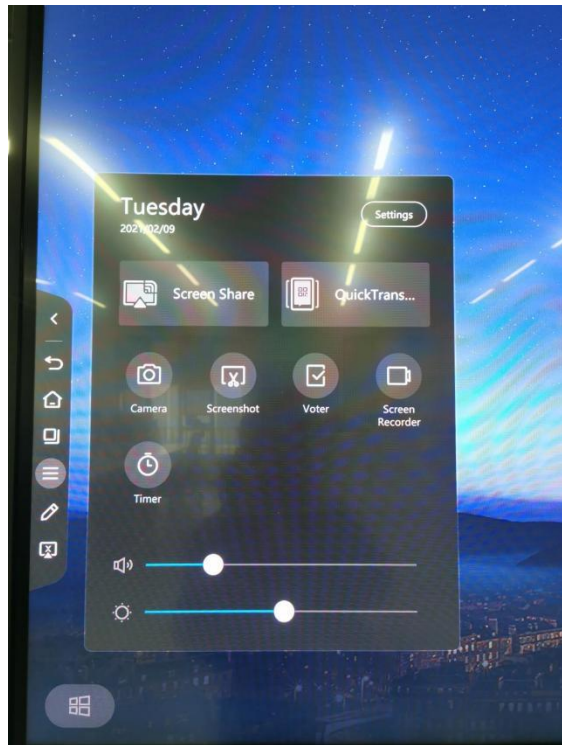

Chapter Six. Quick Tools

MAXHUB

What are quick tools?

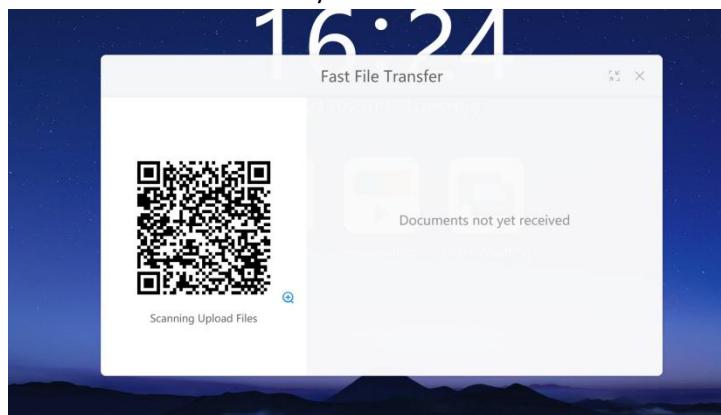

They are quick tool Apps on the IFP. They provide convenient functions in various scenarios and assists in solving the requirements of file transfer, voting, screen recording, timing, screenshots, and photos in the conference.

How to start ?

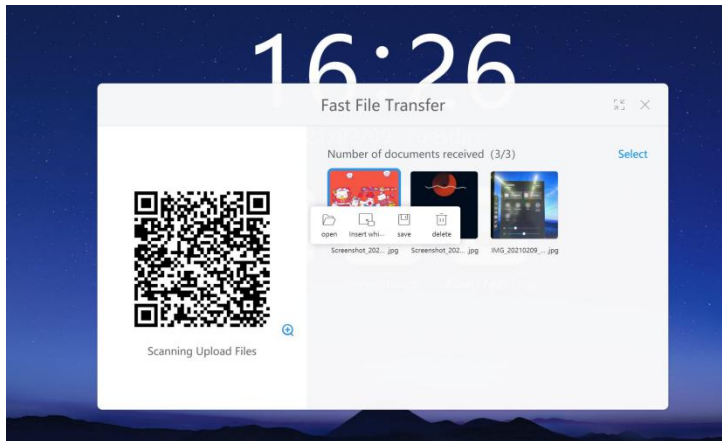

Quick upload widget

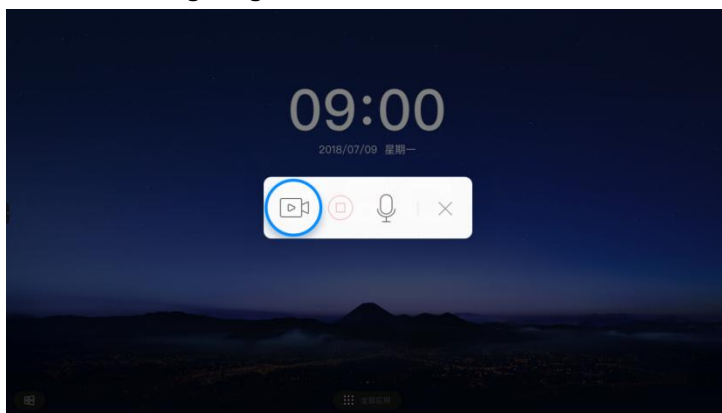

1. Click the "Quick upload" icon in the sidebar to open the quick upload widget.
2. After the mobile phone scans the code, you can choose to upload pictures, texts, and files on the mobile phone
3. Click the minimize button in the title bar of the quick upload interface on the big board to minimize the quick upload interface
4. Click the file received in the fast transfer of the big board, and the toolbar will be displayed, and the file can be opened, (picture) inserted into the whiteboard, saved, and deleted.
5. Long press the received picture on the big board, drag it out of the quick upload interface, and release it to insert it directly into the whiteboard

MAXHUB

Screen recording widget

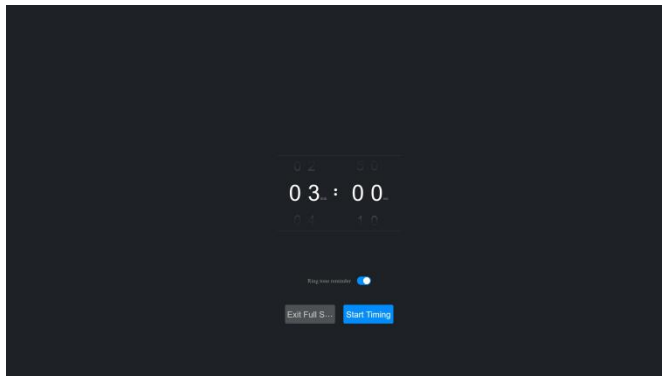

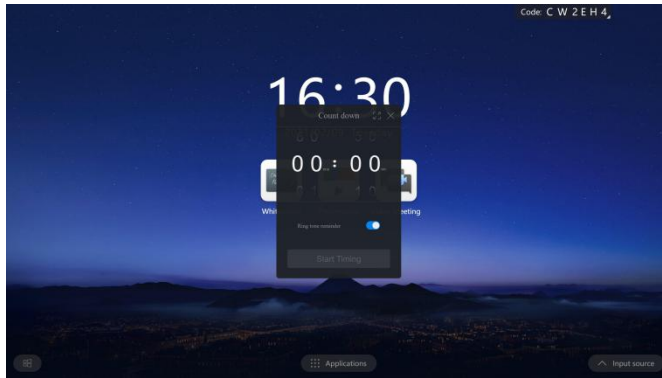

1. Click the "Screen Recording" icon on the side panel to open the screen recording widget.
2. Click the screen recording button to start recording.
3. The screen recording adopts segmented recording, after the recording is combined, after clicking the end recording button, the system will merge the videos recorded in segments.
4. Click the scan code and take away button to display the QR code, scan the code on your mobile phone to get the screen recording video, and the scan code video can be encrypted by entering a password.

Timer widget

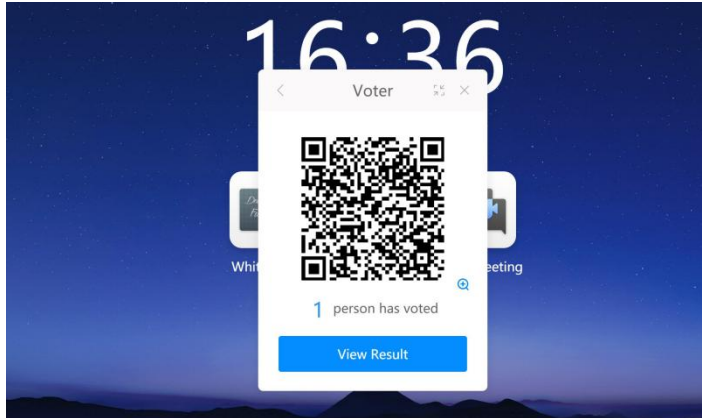

1. Click the "timer" icon on the side panel to open the timer widget
2. Click the "Start Timing" button to start the countdown according to the selected time
3. Select "Ring reminder", there will be a ring reminder before the countdown ends
4. Select "Timeout calculation", when the countdown is over, it will start to count up and record the timeout time
5. Click "Full Screen Display" to display the countdown screen in full screen

MAXHUB

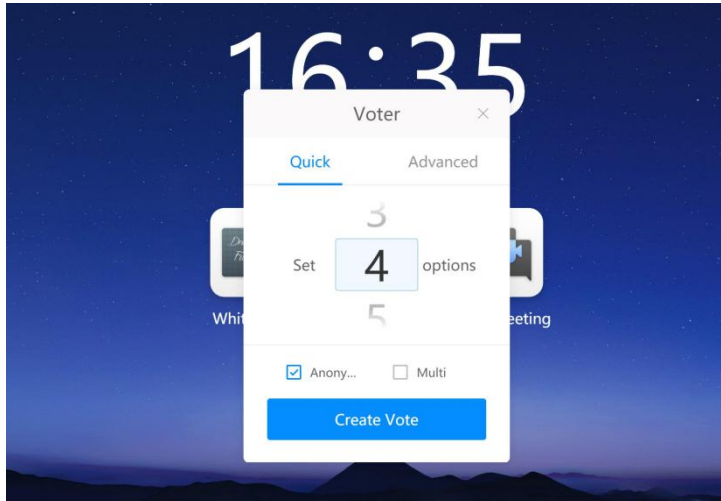

Poll widget

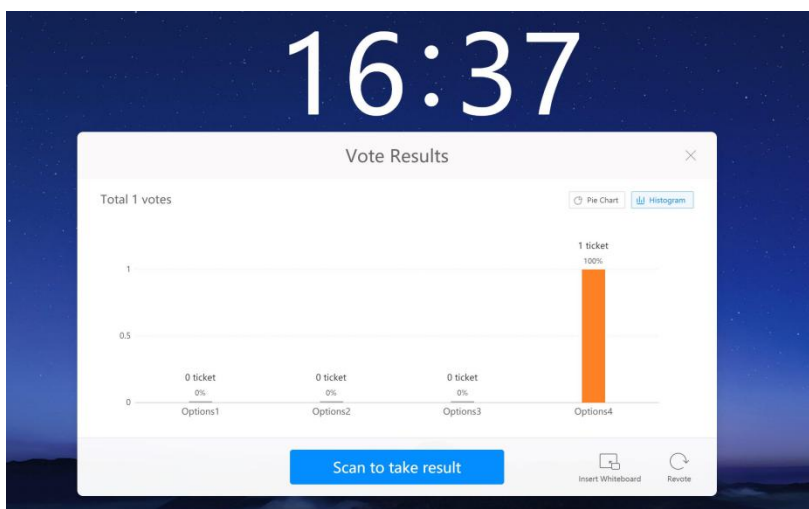

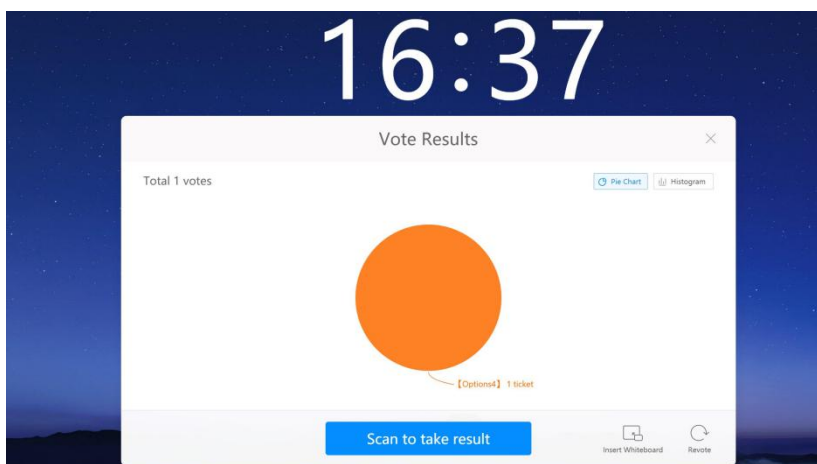

1. Click the "Vote" icon on the side panel to open the voting widget.

MAXHUB

2. Click "Create Voting Code" to immediately generate a voting QR code for the specified number of options. After scanning the code with your mobile phone, you can vote for each option
3. Click to select "Anonymous" to vote anonymously
5. The voting results support histogram and pie chart display, and the voting results can be inserted into the whiteboard and scanned with the code. Or click the "Vote Details" button to view the voting options of each voter. Click "Re-Vote" to re-initiate voting

MAXHUB

Screen-shot widget

1. Click the "Screen-shot" icon on the side panel to open the screen-shot widget:
2. You can press and hold 8 edit points to adjust the screen-shot area, or click the full-screen screen-shot button to take a screen-shot of the entire screen.

MAXHUB

Chapter Seven. Video Conference

MAXHUB

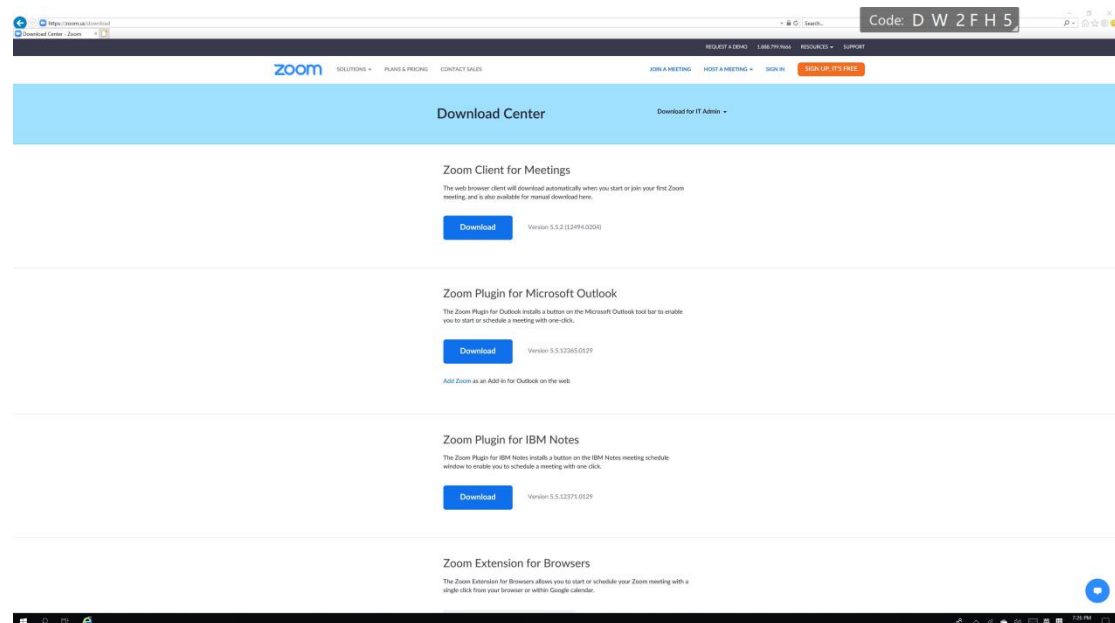

How to use video

The MAXHUB video conference icon on the desktop is an open software interface, and users can open third-party video conferences through this icon. The operation steps are as follows: First, please install the mainstream third-party video conference to MAXHUB (PC module or Android module); then, after installation, enter the settings-application settings, select the required conference software to complete the adaptation; finally, complete the installation and return to the desktop. You can start the video conference via the icon.

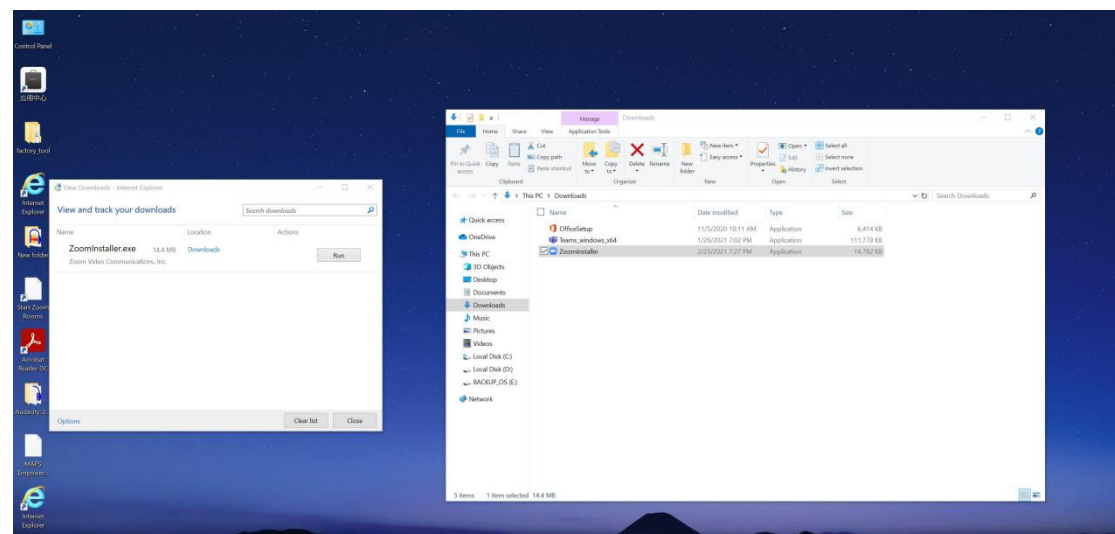

Take ZOOM as an example.

1. Download and install

Go to the link: zoom.us/download to download the zoom.exe.

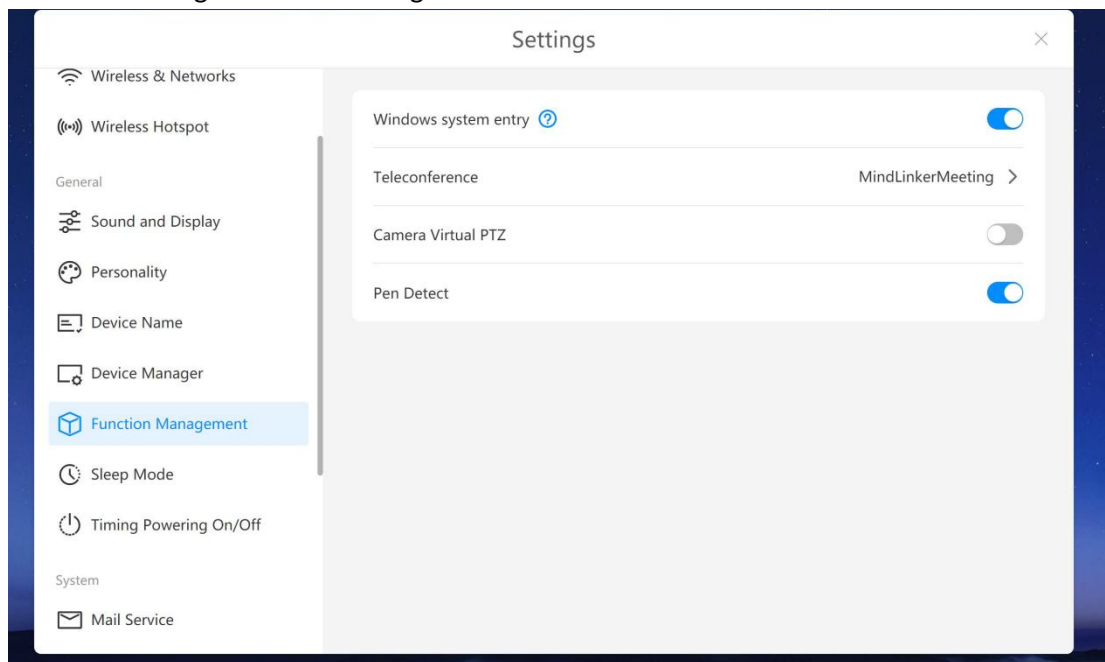

2. Install on MAXHUB local disk.

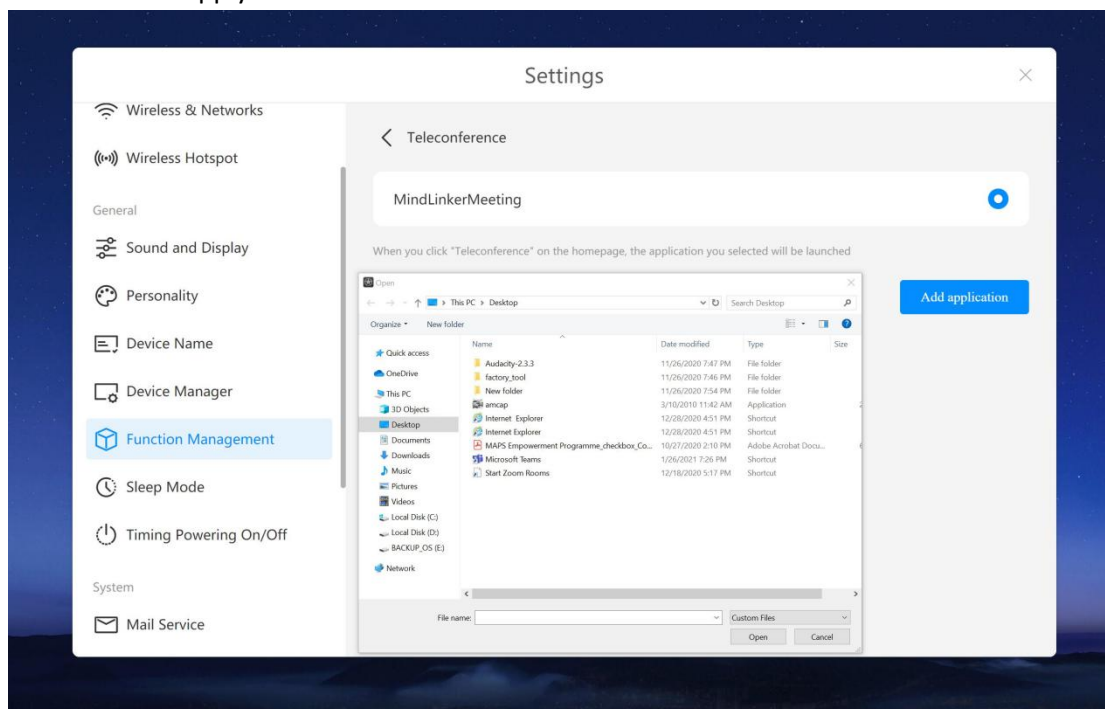

MAXHUB

3. Set up the zoom as the default video conference.

Go to the settings- function Management- video conference.

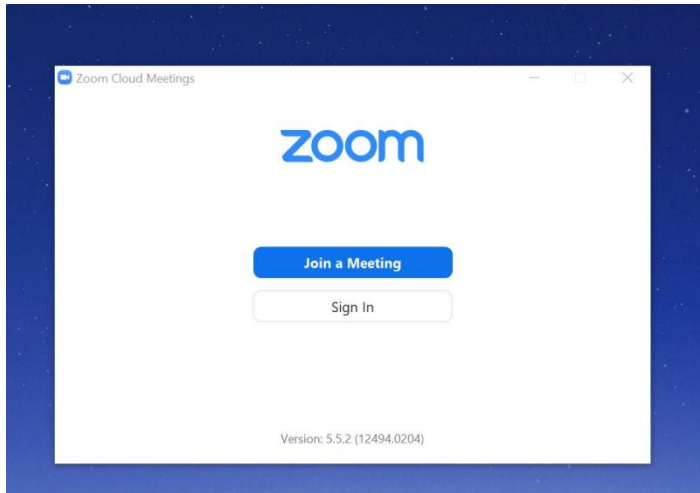

Find the zoom app you downloaded before.

4. Start Video conference

MAXHUB

FAQ

1. Whiteboard FAQ:

Q: How to use eraser

A: During the use of the whiteboard, there are two ways to call up the eraser. One is to directly use the back of the hand or palm to touch the whiteboard to call up the eraser; the other is to click the eraser button in the toolbar below the whiteboard to swipe your finger on the whiteboard to erase. In addition; in addition, you can also use the circle selection erasing mode, if you want to clear the full screen content, you can swipe to clear the screen with one click

Q: How to change the writing background

A: Click "Settings—Background" in the tool bar at the bottom left, then click to select and modify

MAXHUB

the writing background

Q: How to turn on the pen edge effect

A: Click "Settings-Writing" in the toolbar at the bottom left, and click the open button to achieve the pen sharp effect

Q: How to save meeting files

A: Click "Share" in the toolbar at the bottom left, you can choose to use WeChat to scan the code to take away, save to local or USB, send and print by email

Q: What are the file formats for saving

A: Currently, the whiteboard supports saving meeting files as: MHB (whiteboard-specific format), pictures, PDF; you can select the specific format on the save details page of "Share-Save to";

Q: How to move handwriting, pictures, etc.

A: There are two ways to move handwriting or pictures. One is to click the third "Select" button in the middle toolbar, and then you can move or zoom in and out the handwriting, pictures, etc.

Q: How to use gestures to add/delete rows and columns of a table

A: After adding a table on the whiteboard, if the line runs through the entire row or column, you can add rows or columns, and if the line runs through the entire row or column three times, you can delete rows or columns.

Q: Does the whiteboard support multiple pen writing at the same time?

A: Only support dual-tip pens and multiple pens simultaneously on the infrared screen

Q: What to do when sharing or saving fails

A: Please check the network reason according to the interface prompts. If the sharing or saving fails due to the network reason, please check whether the file is larger than 50M. For larger files, it is recommended to delete part of the content and save or save it for multiple times.

2. Annotation FAQ

Q: Two modes of annotation

A: There are currently two modes of annotation. One is the frozen screen annotation entered from the sidebar. In this mode, the annotation function can only be performed on the current screen; the second is the page annotation entered from the toolbar in the ppt playback state. In this mode, writing handwriting moves with page turning or content movement

Q: How to enter comments

A: Click the comment button in the sidebar to quickly enter the single page comment; in the case of ppt playback, click the comment button in the toolbar to enter the page comment

MAXHUB

Q: Can the annotated page be taken away

A: Click "Share-Page Filter" to choose to take away the comment page or the complete ppt

Q: What should I do if I cannot use the mobile network when using the mobile screen transfer assistant to transfer the screen?

A:

(1) The mobile screen transfer assistant uses Wi-Fi for data transmission, and it is currently not possible to use the mobile network when transferring screens;

(2) The mobile phone and the MAXHUB smart conference tablet can be connected to the same local area network. When the screen is transmitted, the mobile phone can also be operated online

Q: There is no sound from the screen of Android phone?

A: Currently, Android phones do not support audio transmission during screen transfer.

Q: How many people can use the conference tablet controller of Mobile Screen Assistant at the same time?

A: It can be used for four parties to watch the real-time screen of MAXHUB smart conference tablet on their mobile phones at the same time, but only one party can control the MAXHUB smart conference tablet at the same time.

Q: Without a wireless screen transfer device, can the computer transfer screen?

A:

(1) Yes, please download the MAXHUB screen transfer assistant on your computer in advance, click More on the MAXHUB smart conference tablet, find the wireless screen transfer, click to open, you can see the screen transfer code

(2) Click to open the screen transfer assistant, enter the screen transfer code on the MAXHUB smart conference tablet,

(3) Click to upload the screen.
